Instructor: Tomasz Przebinda, Room 524, PHSC; home page: http://crystal.ou.edu/; e-mail: tprzebinda@ou.edu; tel: 325-0830

Office hours: Thursday 2:30 - 3:30, Friday 1:00-1:55.

Teaching Assistant: Daniel Benton; Room 826, PHSC, e-mail: danielbenton@ou.edu, tel: 325-6711

Office hours: Wednesday 11:30-1:00 and Thursday 9:00 - 10:25.

Text: We shall be concerned mainly with the material contained in chapters 1 through 6 of a book ”Calculus” by James Stewart

Course outline: This is an accelerated calculus course designed for students who had excellent grades in previous math courses. We shall move quickly and cover more details than in a usual calculus class.

Exams: There will be two midterm exams during the class period (45 minutes), on Wednesday Oct. 4th and on Wednesday Nov. 29th. The final exam on Friday Dec. 15th, 8:00 AM - 10:00 AM (in the same room). University regulations require that you take the final exam at this time. Do not arrange travel plans that prevent you from attending the final exam. Under extraordinary circumstances, if you cannot take a test at the scheduled time, you should contact me in advance of the test time.

Homework: There will be weekly assignments, posted on my homepage crystal.ou.edu, to be handed in on Monday at the beginning of the class. Please hand in your homework on time (Mondays 9:30); late assignments cannot be accepted.
**Final grade**

final exam 35% + (midterms 20% + 20%) + homework 10% + points earned in the help sessions with Daniel Benton 15%

**Students with Disabilities:** Any student having a disability that may interfere with the demonstration of his or her abilities should contact me as soon as possible to arrange accommodations necessary to ensure full participation in the course.

**Grade of Incomplete:** The grade of “I” is a special-purpose grade given when a specific task needs to be completed to finish the course work. This is typically a term paper or other special assignment, so rarely makes sense in a mathematics course. An “I” cannot be given to avoid a low grade in cases where the course work is not strong.
